23738 Lensahn, Germany

FURTHER INFORMATION

If you need any more information, our knowledgeable Customer Service Team is available to answer any of your questions about product characteristics or use of products. Alternatively, you can reach out to your Commercial contact directly regarding product availability in your market.

Our user-friendly website contains not only details of all our products but also downloadable material and industry news.

THE KEY SURGICAL STORY

Key Surgical was founded in 1988 by three entrepreneurial women with years of experience in both the nursing profession and the medical supply industry. Motivated by the growing need for a single source supplier that would provide excellent Customer service, the partners began building an extensive product line based on market need.

Over 30 years later, Key Surgical continues to be the leading brand for sterile processing, operating room, and endoscopy products; supporting a wide range of processes and procedures in hospitals, same-day surgery facilities, GI centers, and more.

OUR MISSION

We've recently joined STERIS as a leading global product brand, continuing to support patient safety with an emphasis on infection prevention and reprocessing.

This relationship is designed to enhance your Customer experience by providing you with more of what you need in infection prevention for sterile processing, the operating room, and endoscopy.

Our dedication to your team and advocating for excellence in the industry remains the same; and together we will create a HEALTHIER AND SAFER WORLD.

A NOTE ABOUT QUALITY

Key Surgical is committed to manufacturing and distributing the highest quality medical products, and to maintaining the highest level of compliance to FDA and ISO regulations. Nobody can claim to be perfect, but we strive to continuously improve our processes and systems so that we will always be closer to perfect tomorrow than we are today.

CUSTOMER LETTER

Thank you for being our Customer and for choosing us to be your trusted supplier for products and solutions for your CSSD. Our Customers are at the forefront of everything we do; we are dedicated to meeting the healthcare industry's highest quality standards for patient care, safety, and efficiency in hospitals, clinics, and surgical centers around the world. As your partner, we promise to continue providing a comprehensive selection of products and personalized service you won't find anywhere else.

Our Customer base of hospitals, theatre centers, and distributors continues to expand throughout the world. We're committed to continuously making investments in our products, quality system, regulatory and compliance efforts, and operations with the goal of being the easiest company with which to do business.

Although seemingly simple, focusing on delivering an exceptional experience with us every step of the way is, and will continue to be, the foundation of why we do what we do. Our entire team works hard every day to be recognized by you as a company of dedication, honesty, and integrity. In striving toward that recognition, we promise to keep our feet planted firmly on the ground and to make sure we brighten both your day and ours in the process.

If we can ever be of assistance, please call or email us. Businesses grow because they do the right things for their Customers and their employees. We intend to keep doing those things and to keep growing, and we truly appreciate your business and thank you for your continued support.

Sincerely,

From all of us, Thank you.

INSTRUMENT CLEANING & MAINTENANCE

The manual (pre) cleaning of surgical instruments and products is a basic requirement for successful preparation. As the variety of medical products to be reprocessed is increasing and the instruments are becoming more complex, Key Surgical offers a selection of different brushes, material cleaners, and care products for a wide range of purposes.

Our cleaning brushes are available in various sizes and materials for the most common surgical instruments, for flexible endoscopes, and for special preparation requirements.

Material cleaners and care products not only support you in your preparation, but also in the subsequent maintenance of your instruments.

Cleaning accessories, such as brush strips and preparation aids that helps with the cleaning of instruments that cannot be dismantled.

Instrument Cleaning & Maintenance - Toothbrush-Style Brushes

TOOTHBRUSH-STYLE CLEANING BRUSHES

The special brushes from Key Surgical are ideal for cleaning the outside of the surfaces of instruments before automated disinfection and sterilization is provided. Regardless of the stubbornness of the soiling of your instruments to be cleaned, you are sure to find the right solution thanks to the varying degrees of hardness, sizes, and shapes of the brushes. Even coagulated blood residues can be easily removed due to specially developed nylon bristles. Key Surgical specialized brushes are also suitable for cleaning pan burrs and removing residues in the joints of needle holders and scissors.

Instrument Cleaning & Maintenance - Preparation Aids

PREPARATION AIDS

The Key Surgical clamps are made of plastic keep to joints and jaws open, such as in bone forceps, and allow the cleaning of all critical areas. The new conchotome opener makes it easier to dismantle instruments such as rongeurs, conchotomes, Blakesley forceps and similarly constructed instruments. These clamps keep instrument parts open throughout the high level disinfection process. Heat resistant up to 134 °C. Single use.

WRAPS & LINERS

Our flexible production methods ensure that the best sizes of wrap can be produced for our Customers, even if these are not industry standard sizes, without compromising performance or protection levels.

Our Barrier Wraps provide a bacterial barrier and protect the contents of a set or pack from contamination. When classed as alcohol repellent, barrier wraps can be used within the sterile field.

Choice Wrap is designed to reduce the risk of rips, tears, and wet packs. Choice SMS are made of polypropylene. Choice Wraps can be interleaved in blue or green to meet the sterilization service user requirements.

All Transport Wraps must be used in conjunction with one compliant Barrier Wrap to completely prevent the ingress of microorganisms. Use of a single barrier layer with Transport Wrap can be a cost-effective solution that reduces damage in handling and transport. If adopted, changes to both wrapping and unwrapping procedures may be required to ensure aseptic opening.

Choice Wrap

Double Wrap

Crepe Wrap

Wraps & Liners – Double Wrap Choice Together

A RELIANCE® SOLO WRAP

A two-sheet wrap system, with two colors joined together along the sides. Each sheet is a five-layer nonwoven tray wrap, manufactured from spun-bonded and melt blown polypropylene, providing a wet and dry microbiological barrier. Bonding the wrap simplifies the wrapping process whilst increasing durability to avoid rips, tears or punctures. Wraps are also available interleaved with other compliant barrier layers, or transportation wrap. Compatible with steam and EO sterilization. Single use. Choice Wrap variants meet ISO 11607-1 and EN 868-2 requirements.

INSTRUMENT PROTECTION

The protection of instruments has never been more important. As a result of increasing centralization, the merger of CSSDs and external reprocessing, transport routes are becoming ever longer. This means that sensitive and complex instruments have to be protected not only within your own hospital, but often when being transported off-site.

Instrument Sleeves are made of special cardboard or transparent film and are used to protect high-quality instruments from damage during preparation, transport and storage. The shape of the protectors is not directly adapted to the respective instrument. This has the advantage that these protective sleeves are suitable for the most common instruments as well as for special shapes (such as hooks or knives).

Instrument Tip Caps are designed to extend the life of your instruments. Our tip caps protect your valuable instruments from unnecessary wear or damage, helping reduce repair costs while giving you the peace of mind that your instrument investment is being protected. In addition to protecting and extending the life of your valuable instruments, tip caps also help to protect sterilization packs from puncture and protect employees from sharp instruments.

Available in a variety of shapes and sizes to fit all your instrument protection needs, we have the perfect tip cap for each of your various instruments, from flat caps to twin caps to retractor caps, and they are available with or without perforations, depending on your preference. Our tip caps are radiopaque, single use, and compatible with steam sterilization.

TAGS

Our tags allow you to indicate special handling instructions, secure trays and carts from tampering and quickly identify priority instruments for repair and sterilization. Tags are available in a wide range of styles, colors and locking configurations. Printed tags with special handling instructions, as well as uniquely numbered tags, are available as a standard product. Need a customized tag? We can do that for you!

Write-On Tags allow you to write specific handling instructions on each tag when more detailed communication is necessary. These tags attach to instruments and trays with ties, and are larger and more visible than other tags, ensuring that detailed instructions will be seen easily.

Metal Tray Tags clip onto the edge of a tray and provide ample space for identification, tracking and barcoding needs. Made with stainless steel for durability.

TRAYS & ACCESSORIES

Strict requirements have to be met when it comes to the reprocessing of various instruments and medical devices. Key Surgical offers a wide range of solutions for the optimization of the reprocessing cycle.

In order to meet the needed requirements, we offer sieve baskets and sterilization trays in a variety of designs, sizes and made of premium material for versatile use (e.g., ophthalmology).

In the Key Surgical product portfolio you will also find comprehensive sieve tray accessories for multiple applications and to protect your sensitive instruments.

Wire Containers

Perforated Plate Mesh Trays

Wire Baskets

Special Sieve Trays

Plastic Sterilization Trays

Instrument Stringers

Silicone Inserts and Sieve Organization

Unless otherwise stated, our products are not made with natural rubber latex.

Trays & Accessories - Wire Containers

Key Surgical supplies a wide range of stainless steel sieve trays which supports optimal and efficient processes. Our wire containers (Kögel sieve baskets) with a long shelf life are available in DIN and ISO formats in the most widely used sizes, with different mesh grid size and designs.

PAPER SEALS

We offer you an environmentally friendly way of closing containers. The seals can be attached to almost all common containers and follow a simple principle. With our paper seals you ensure safe closure for transport and storage due to thermal closure of the components. Available in different versions with and without documentation fields. In some cases, it is also possible to stick on labels. Single use.

PERSONAL PROTECTIVE EQUIPMENT

Face Shields are available in several styles to fit the preferences of every individual. We offer full and short face shields, with masks, with Tyvek™ expanders, with ties and with ear loops. All of our face shields offer different types of protection. Barrier Gowns are lightweight, comfortable, and breathable.

Nitrile gloves are powder-free, available in 24cm, 30cm and 40cm. They are treated with an antibacterial and anti-mildew agent.

We also offer sterilizer mitts made in silicone. These provide you with a protection barrier for removing hot trays and racks.

INSTRUMENT IDENTIFICATION

The KeyDot® is a small, laser-etched, 2D Data Matrix barcode label that can be applied directly to an instrument's surface. Tested for sterilization compatibility for use on stainless steel surgical instruments, it has been conveniently incorporated into most of the instrument tracking software applications available today. With the KeyDot there is no specialized training or intricate equipment needed so application can be done on-site, eliminating the hassle of sending your instrument sets out for this tracking solution.

Our Identification Tape is designed to help you organize and identify instruments as they move between sterile processing and various departments. Using tape can help save you time, effort, and money by offering effective organization and identification of your surgical instrumentation. It is easy to apply and is compatible with steam and H₂O₂ sterilization. We have the broadest selection of tape available and it is colorful, easy to use, and economical. Adhesive Remover is designed to dissolve tape residue on instruments, trays, basins, and other surfaces. Adhesive Remover is the citrus based solution you need to remove residue without causing any damage.

Instrument Identification

HOW DOES KEYDOT WORK?

The KeyDot works like a license plate. It links a specific instrument to a data file within a software application, allowing that instrument to be tracked throughout the complete instrument processing cycle. Instruments marked with the KeyDot are scanned using a two-dimensional barcode reader. Scanners and software applications not available through Key Surgical.

THE KEYDOT IS EFFICIENT

KeyDot provides you with the convenience to decide what to mark and when to mark it – you're in control. Since there are no equipment requirements or complicated procedures and training involved, instruments can be marked with a KeyDot on a continuous basis by anyone in your department, starting with critical instruments and expanding at an individual pace.

KEYDOT®

With the KeyDot there is no specialized training or intricate equipment required. Applying a KeyDot to a surgical instrument is quick and easy: simply clean, lift, place, and press. The instrument then needs to be sterilized to cure the adhesive and assure firm adhesion.

1 clean application area

2 lift KeyDot from sheet

3 place KeyDot on instrument

4 apply firm pressure and sterilize to secure adhesive

FREQUENTLY ASKED QUESTIONS

IS KEYDOT SAFE FOR OUR SURGICAL INSTRUMENTS?

Yes. A licensed, independent medical testing laboratory has scientifically evaluated the KeyDot and found that the instrument surfaces under the KeyDot are completely sterilized during processing.

HOW LONG WILL OUR KEYDOT LAST?

The radial design of the KeyDot means there are no corners to lift up. The Data Matrix barcode is also highly redundant – even if up to 60% of the barcode is destroyed, the KeyDot is still readable. The KeyDot is designed to withstand harsh environmental and temperature conditions. If a KeyDot needs to be replaced, anyone can do it at a convenient time in a matter of seconds.

DO I HAVE TO PROGRAM KEYDOT WITH MY OWN NUMBERS?

No. All KeyDots are manufactured and shipped with a unique number. We guarantee that there will be no duplicate numbers in the labeling sequence. Custom sequences can also be requested. Simply apply the KeyDot and easily link it to the appropriate data file in your software application.

KEYDOT GUARANTEE

Key Surgical guarantees that our KeyDot labels will remain readable for at least 200 processing cycles or two years, whichever comes first. Simply send us the supporting documentation from your instrument tracking system and we will replace, free of charge, any KeyDot that does not meet our performance benchmark.

Instrument Identification – Cable Binders

CABLE BINDERS MADE OF SILICONE

Cable binders can be used to bundle different instruments. They can also be used to affix sieve basket labels or for quick visual identification of instruments, sets, and trays due to the unique properties. Our silicone products offer excellent fixation properties and at the same time protect the bundled objects. These facilitate the organization of the sieve during the packing process in the central sterile services department (CSSD) and during removal in the operating theatre. Available in different shapes, colors, lengths, and closure variants or different needs, such as in the operating theatre for marking instruments for repair or replacement. Tear-resistant. Single use. Heat resistant up to 134 °C.

Instrument Identification – Bundling String

Bundling strings and cable binders can be used to bundle up a wide range of instruments. They are also used to secure sieve tray labels or for the rapid visual identification of instruments, sets and sieve trays. Thanks to the unique properties of silicone, our silicone products ensure excellent fixation yet are still gentle on the bundled items. These facilitate the organization of the sieve during the packing process in the central sterile services department (CSSD) and during removal in the operating theatre. Available in different shapes, colors, lengths, and closure variants or different needs, such as in the operating theatre for marking instruments for repair or replacement. Tear-resistant. Single use.

QUALITY MONITORING & ASSURANCE

Process monitoring and documentation have grown in importance in the field of medical device reprocessing over the past years which, in turn, has led to a significant increase in quality. The use of batch controls and random tests is common practice today and helps proper processing.

Routine controls in between annual maintenance and validation cycles provide consistent procedures and help to guarantee compliance with the applicable guidelines and standards. The Key Surgical product portfolio in this segment is growing continuously to enable you to maintain high quality standards.

- Indicators for standard instrument and endoscope washer-disinfectors, and ultrasonic baths to check the cleaning efficacy of the cycles
- Ink-based seam seal integrity tests or color analysis with indicator strips
- Hollow load process challenge tests for routine monitoring – reusable and single use options
- Routine and batch control systems for long-term use
- Batch controls for all widely used sterilization methods such as steam, low temperature (EO, FO, H₂O₂)
- Bio-indicators for routine checks and microbiological validation of most sterilization/ disinfection procedures
- Other quality controls such as disinfection indicators, indicator dots, counting strips, control/insertion cards, sterilization protocols and documentation pads
- Test materials for quality control of medical instruments (functional capacity, cleaning outcome, information on diameter, length and weight) and for workplace optimization

Cleaning Indicators

Bowie-Dick Tests

Sterilization Monitoring

Monitoring Equipment

Unless otherwise stated, our products are not made with natural rubber latex.

Quality Monitoring & Assurance - Cleaning & Disinfection Monitoring Blood-Based Test

Cleaning is the first and most important step in the reprocessing cycle so it must be checked with appropriate care. Cleaning indicators and monitoring systems are used to verify cleaning performance. They are used to simulate soiled surface structure, joints, cavities and complex lumens, and challenge the efficacy of the cleaning cycle in a washer-disinfectors (WD). Results are assessed based on the presence or absence of soil in the indicator after the cleaning cycle.

A T-EZ PRO™

The T-EZ Pro "All in One" contains a sheep blood compound that correlates to human blood. It is easy to use: just remove the T-EZ Pro from its package and attach it directly to the sieve tray. Thanks to the transparency of the plastic, there is no need to remove the indicator strip from its PCD for interpretation. However, it is possible to open the test body and archive the indicator for documentation purposes.

Quality Monitoring & Assurance - Sterilization Monitoring

BATCH CONTROL FOR SMALL STEAM STERILIZERS

The LCpro Mini Set is suitable for batch monitoring of the sterilization process of small steam sterilizers of class B. Reduce your clinical waste with the help of a reusable test body made of resistant materials. The 4-step indicator becomes black when the process has been successfully completed, enabling a quick interpretation of the result. It can be kept in your documentation for track and trace purposes.

HELIX TEST

REF	Description	Properties	Qty
B 08003	Helix Test - steam control indicator - type 5	steam: 134 °C - 3.5min., 121 °C - 15 min. format: 6 x 74mm self-adhesive with color comparison	1 box
C 08087	Helix Test - test model for steam, gas and H ₂ O ₂ sterilization - type 2	material: 1.5m long, reusable PTFE hose (Teflon™), Inner Ø 2mm. The test body also meets the requirements of DIN 58948, EN 14180 and the EN 13060	1 pc
D 08088	Helix Test - test model for steam, gas and H ₂ O ₂ sterilization type 2	material: 2.0m long, reusable PTFE hose (Teflon™), Inner Ø 2mm. The test body meets the requirements of DIN 58948, EN 14180 and the EN 13060	1 pc

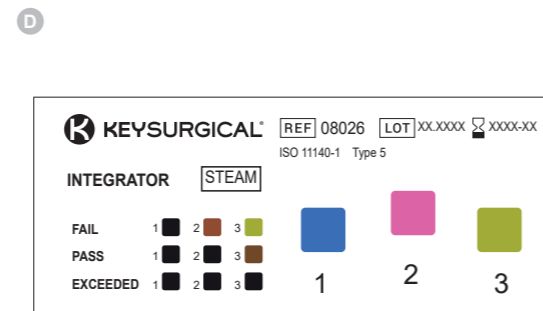

Quality Monitoring & Assurance - Sterilization Monitoring

INDICATOR POINTS AND STRIPS FOR STEAM STERILIZATION

We offer indicators in various designs for additional quality assurance. The indicator points serve as quick evidence that a sterilization process parameters have been met.

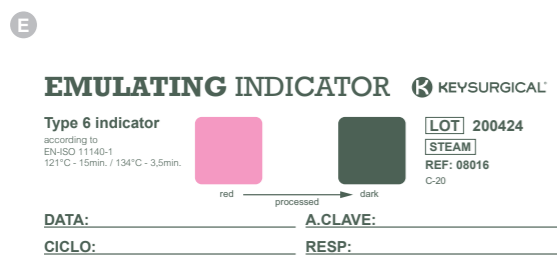

REF	Description	Properties	Qty
A 01401	indicator point, self-adhesive	with steam indicator Ø 10mm	1 roll
B 01159	indicator point, self-adhesive	with steam indicator Ø 15mm	1 roll
C 01410	indicator strips	with steam indicator format: 20 x 170mm	1000 pcs
D 08026	three-phase indicator - type 5	steam: 121 °C / 134 °C 200 strips	1 box
E 08016	steam control indicator - type 6	steam: 134 °C - 3.5 min., 121 °C - 15 min 1x test body 250 strips	1 box

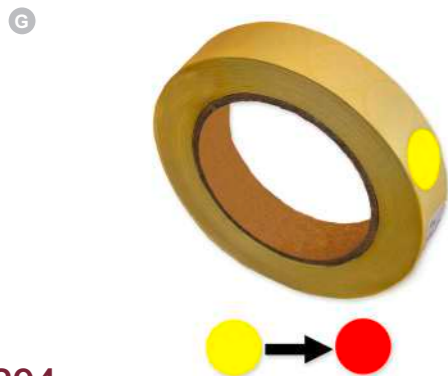

INDICATORS FOR HOT AIR STERILIZATION

The self-adhesive, pre-cut and perforated indicator makes documentation easier because it can be glued to the five documentation sheets supplied during use. The indicator strip is compatible with hot air sterilization at 180 °C for 30 minutes. The given color comparison ensures a comfortable, easy and safe evaluation.

REF	Description	Properties	Qty
F 08002	hot air indicator - type 4	thermo-control: 180 °C - 30 min format: 9 x 48mm box: 120 strips	1 box

Quality Monitoring & Assurance - Sterilization Monitoring

INDICATORS FOR EO, FO AND GAMMA STERILIZATION

REF	Description	Content	Qty
A 08006	Helix Test - formaldehyde Indicator - Type 4	format: 6 x 74mm self-adhesive with color comparison 1x test body box: 200 strips	1 set
B 01415	indicator point, self-adhesive	with FO indicator, color change from purple to green format: 16 x 22mm	840 pcs
C 01414	indicator point with text, self-adhesive	with EO indicator Ø 15mm	1 roll
01408	indicator point, self-adhesive	with EO indicator Ø 16mm	1080 pcs
D 01407	indicator strips, self-adhesive, with rear slit	with EO indicator format: 15 x 50mm	1000 pcs
E 01419	indicator strips	with EO indicator format: 20 x 100mm	1000 pcs
F 01405	indicator strips, self-adhesive, with rear slit	with EO indicator format: 20 x 170mm	1000 pcs
01418	gamma indicator point, self-adhesive	Ø 12.5mm dose range:> 10 kGy (> 1mrad) 5000 pieces per roll	1 roll
G 01417	gamma indicator point, self-adhesive	Ø 12.5mm dose range:> 10 kGy (> 1mrad) 1000 pieces per roll	2 rolls

Quality Monitoring & Assurance - Sterilization Monitoring

INDICATORS FOR H₂O₂ STERILIZATION

REF	Description	Content	Qty
A 08102	Helix Test - batch control with H ₂ O ₂ indicator	color change from pink to yellow self-adhesive 1x test body box: 100 strips	1 set
B 01413	indicator point, self-adhesive	with H ₂ O ₂ indicator Tyvek format: 10 x 10 mm	500 pcs
C 01411	indicator strips, self-adhesive, with back slit	with H ₂ O ₂ indicator Tyvek, format: 20 x 170 mm	200 pcs

QUALITY DOCUMENTATION

REF	Description	Format (mm)	Qty

F 01162	sterilization control card with steam indicator	148 x 105	1000 pcs
G 01412	sterilization protocol for the H ₂ O ₂ sterilization	A4 sheets	50 pcs
H 09243	counting strips suitable for 10 cycles (imprinted no. 1-10) to count reprocessing cycles. Made of plastic. Compatible with washer-disinfectors and steam sterilization	NA	200 pcs
I 09247	counting strips for 10 cycles (imprint no. 1-10) suitable for reprocessing cycles. Made of silicone. Compatible with washer-disinfectors and steam sterilization.	NA	100 pcs

Quality Monitoring & Assurance - Monitoring Equipment

Our test equipment is designed to help you in a wide variety of areas in the CSSD to maintain a high quality standard. The test aid set is an innovative all-in-one solution designed to support routine checks of surgical instruments.

TEST AID SET IN ACCORDANCE WITH DIN 58298

For testing the functionality of surgical instruments.

REF	Description	Qty
A 08500	test - equipment includes: <ul style="list-style-type: none"> • for bone splitters, hollow chisel forceps and bone punches: cardboard 160 gsm • for traumatic clamps, paper 30 gsm, polybag 50 µm • for surgical scissors, latex strap, styrene-butadiene rubber • for chisels, raspatories, bone curettes and sharp spoons: plastic round profile • for needle holder, wire 0.4 / 0.6 / 0.8 / 1.0mm, PTFE strap 0.2 mm • for non-cutting conchotome, synthetic film with a strength of 300 µm • for forceps, plates made of synthetic material 1.0 / 1.5 / 2.0 / 2.5 / 3.0 / 4.0mm, • for scalpels, knives and cutting conchotome, synthetic film with a strength of 100-µm test drum made of synthetic material • magnifying glass with 5X zoom 	1 set

REFILL ITEMS FOR TEST AID SET

According to DIN 96298-3.

REF	Description	Qty
95172	cardboard, 160 gsm	50 pcs
95141	synthetic foil with a strength of 100 µm	100 pcs
95140	test drum	1 pc
08502	red latex tape, 100% latex, powdered with talc	1 pc
95169	round profile with a diameter of 6mm	1 pc
95154	plates made of synthetic material 1.0 / 1.5 / 2.0 / 2.5 / 3.0 / 4.0mm, each	3 pcs
95143	paper pack, 30 gsm	1 pc
95155	wire 0.4 / 0.6 / 0.8 / 1.0mm each	10 pcs
95139	synthetic foil with a strength of 300 µm	50 pcs
08534	styrene-butadiene rubber NR-SBR	1 pc
09912	polybag 50 µm	1000 pcs
1904180	hand magnifying glass, 4x zoom with led	1 pc
B 08509	monocular magnifying glass, 10x zoom	1 pc

REFILL ITEMS FOR TEST AID SET

According to DIN 96298-3.

REF	Description	Magnification	Properties	Qty
A 09973	3 LED magnifying lamp (white) 10 W	2.5 times lens: 150mm	table lamp with articulated arm (80cm). Attachment: table clamp with screw fastening. Clamping area: 6.5cm on / off switch on the lamp foldable cover for protection of the real glass lens. Easy to clean with internal springs. Light color: daylight (6500K). Operating voltage 230 V.	1 pc

Quality Monitoring & Assurance – Monitoring Equipment for Sealing Devices & Accessories

INKCHECK® SEAL TIGHTNESS TEST

Suitable for routine testing of sealed seams in accordance with DIN EN ISO 11607-1, Annex B. Each set of InkCheck consists of 50 ampules with 2 ml indicator solution and a magnifying glass card (REF 08529). InkCheck offers easy handling twist-off cap aiming to reduce spills and drips, suitable for all standard packaging paper/Tyvek®. The new generation of the seal seam tightness test InkCheck Plus provides simple and clean handling in one step. Single use.

	REF	Description	Qty
A	08101	InkCheck	50 pcs
B	08116	InkCheck Plus	30 pcs
B	08124	InkCheck Plus Tyvek	30 pcs

C SEAL PROOF

Seal Proof helps you validate sealers. Single use. Deviations in the sealing process, temperature and the contact pressure are shown on the indicator strip. All this in three simple steps:

1. Place Seal Proof in a cling-free clear pouch
2. Run through the sealing device once
3. Evaluate color change

	REF	Description	Format (mm)	Qty
	08011	for transparent bags (paper foil)	173 x 91	250 pcs
	08017	for Tyvek bags (Tyvek film)	172 x 90	100 pcs

DOCUMENTATION

Ever stricter standards mean that complete documentation is now part of everyday routine when reprocessing instruments. Key Surgical offers a vast array of labels for identification of your sterile goods. Our range includes both paper labels for single use and longlasting foil-based labels. Take advantage of our comprehensive range and label your medical devices to meet your specific requirements.

Our foil and paper labels are available in almost all formats, and for paper labels you can choose between those with and without indicators for reliable identification in ongoing production for all common sterilization processes.

In our product range you will also find labels for low-temperature processes, such as H₂O₂ and thermo transfer foil I in a selection of qualities.

Paper Labels

Foil Labels

Thermo Transfer Foil

Pre-printed Labels Labellers and Labelling Accessories

Miscellaneous Documentation Items

Unless otherwise stated, our products are not made with natural rubber latex.

Document the contents of your packaged medical devices using our high-quality paper labels. The labels are compatible with virtually all label printers, so you can print them according to your requirements and are thus always sure of finding the most important information at a glance. In the Key Surgical portfolio you will find labels in common formats. The duplex self-adhesive labels are particularly suitable for documentation in patient files. You will also find in our portfolio labels wound on the inside or outside and on various reel cores. Labels without tear-off perforations are ideal for cut-off printers.

SINGLE LABELS AND ENDLESS LABELS - WITHOUT INDICATOR

Blank without indicator, wound outside. For single use.

A THERMO TRANSFER FOILS

Thermal transfer reels with various coatings and features, suitable for your printer and labels. We recommend the premium resin which is particularly suitable for film carrier material (except 09858, which is only for paper). Wax/resin features are suitable for the most common requirements of the central sterile services department (CSSD) and especially for paper labels, and the wax feature is suitable for simple applications without thermal requirements. Coated on the outside or inside, so you are guaranteed to find the right foil reel for your printer in our range.

A

PRE-PRINTED LABELS

Pre-printed labels provide visual support for communication between the individual departments. Additionally, warning signs ensure the protection of your staff, for example for burns on hot surfaces, by changing their color when they get hot. Labels for disinfectant bottles help you to comply with labelling requirements.

CSSD EQUIPMENT

On the following pages you will find various products for equipping your CSSD.

The importance of hospital logistics should not be underestimated when it comes to the reprocessing of medical devices and instruments. Short and long distances, safe transport and the avoidance of nosocomial (hospital-acquired) infections are all issues which need to be taken into account.

Dustproof bags protect the sterile barrier, making them perfectly suited for transporting and storing sterile supplies. Key Surgical provides dustproof bags in various sizes and material strengths and with various sealing systems.

Our packing table sheets made of silicone serve, among other things, as impact protection for instruments, and they also make handling easier thanks to the non-slip properties and they also lessen the unpleasant cold, glare, and noise effects of metal surfaces by staff of your CSSD.

[Transport and Disposal](#)

DISPOSAL AND DISINFECTION TRAYS AND ACCESSORIES MADE OF POLYPROPYLENE

These containers are used for the safe transport of surgical instruments and also for longer transport routes, for example when reprocessing outside the facility. With reusable seals, the tub can be securely closed with the lid. Various cable ties and security seals can be attached for color coding. Compatible for washer-disinfectors, not autoclavable, heat-resistant up to 110 °C.

CSSD Equipment – Packing Table Sheets

PACKING TABLE SHEETS

Reprocessing cycles are getting shorter and cycle rates are often increasing due to reductions in staffing levels. With these pressures, inattentiveness when handling instruments is a real risk. Our packing table sheets protect instruments and also aid handling thanks to their non-slip properties. Moreover, they reduce the unpleasant cold and glare of metallic surfaces for CSSD staff. The sheets are available in all formats up to a maximum of 300cm (length) x 120cm (width) and come in a range of colors. The sheets are 2mm thick and are both highly robust and durable. Suitable for washer-disinfectors, heat-resistant.
